Overview

There has been a tremendous amount of growth in the field of digital imaging and image stylization with the advancements in technology over the past few years. With this advancements in technology, we can now generate stylized images using a base image and a style image via a web application. Nowadays there is a lot of demand for image filters and image styling as the social media platforms have greatly increased their reach. So, in this project we have made a Neural Style Transfer Website which is easy to use and can generate a lot of stylized images for the used.

Understanding the problems

01

To style a image we, we were supposed to use some tools like Adobe photoshop, paint etc, which can't be used to combine two images to generate a new stylized image .

02

We also don't have an option to pick two images and combine them to get a new stylized image, using filters i.e. to use our own styles. But now we can add whatever filters we want using different images.

Project objective

We want everyone to give everyone freedom to style the images for free and with their custom styles.

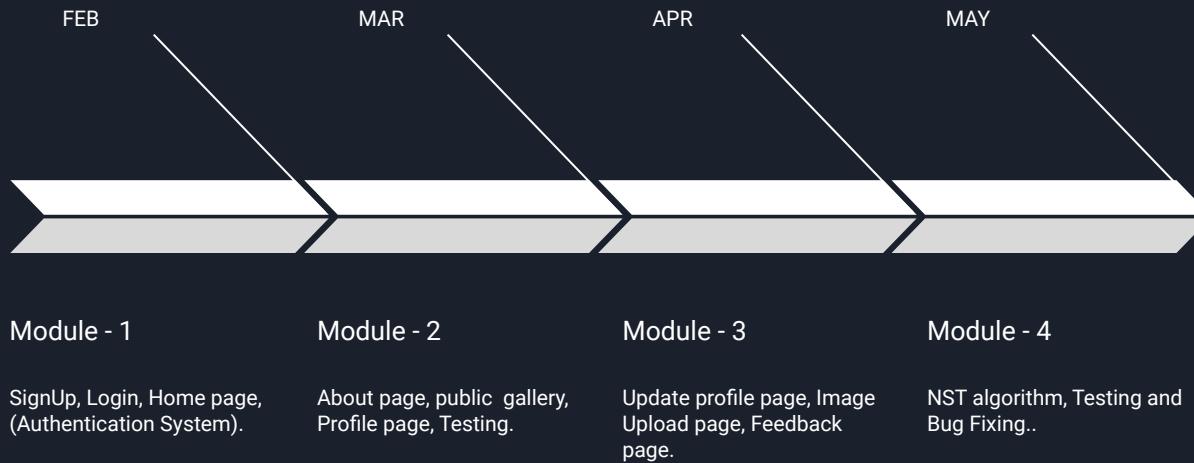

Target audience

1. For people who are willing to enjoy user experience for free.
2. For people who enjoy taking photos and styling them according to their own styles.
3. For Professional photographers to style images accordingly.
4. For social media savvy people who use a lot of image filters.

Neuresta - Neural style transfer for dummies

Everyone has those pictures that just seem so perfect, what if I told you you can stylize these images?

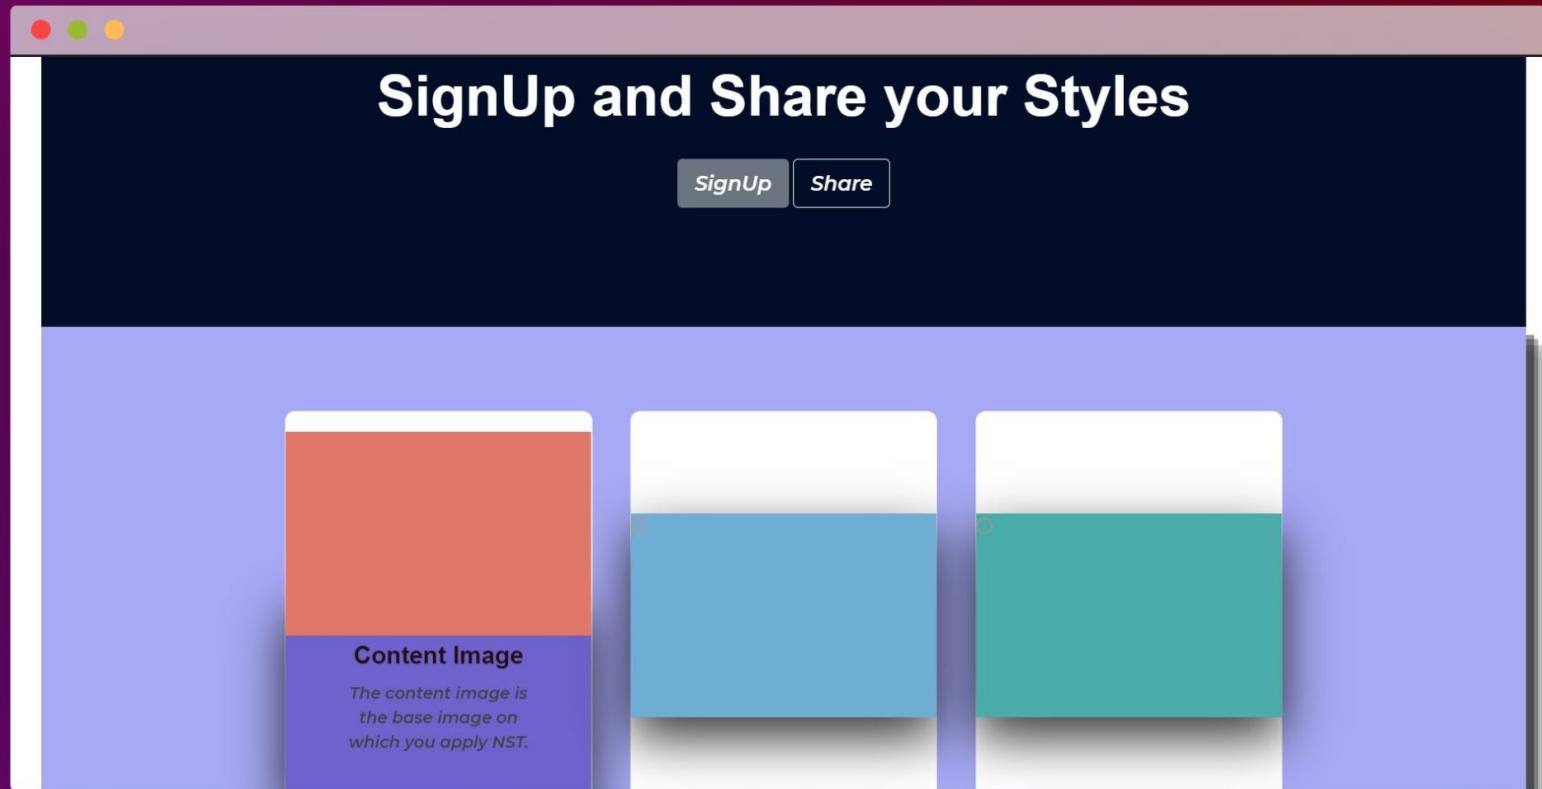

With Neuresta, all you have to do is input one content image (ex: a picture of you) and one style image (ex: a pattern you like).

Boom! now you have a new picture of you styled with that pattern.

Feedback page

A screenshot of a feedback page from a website named Neuresta. The page has a light blue header with a dark blue sidebar on the left. The header contains the website name 'Neuresta' and navigation links for 'Home', 'About', 'Gallery', and 'Feedback'. On the right side of the header are links for 'Upload', 'Profile', and 'Logout'. The main content area has a title 'Feedback' and a sub-instruction 'Please fill this form to let us know about our website.' It features three input fields: 'Name', 'Email', and 'Message', each with a light gray background. At the bottom, there is a checkbox labeled 'I Accept the Terms of Use & Privacy Policy.' and a dark teal 'Submit' button.
